

# OTAVA CLOUD BACKUP FOR MICROSOFT 365

POWERED BY VEEAM

## Look no further for full Microsoft 365 data protection

Built for the latest and greatest Microsoft 365 productivity cloud services, Otava Cloud Backup for Microsoft 365 is a comprehensive backup and recovery solution for Microsoft Online Applications in a simple as a Service package. Get complete protection against accidental deletions, malware, security threats and retention policy gaps. With no additional fees for bandwidth, storage or licensing, it's never been easier to back up your critical data.

### YOU'RE A PERFECT FIT FOR OTAVA CLOUD BACKUP FOR MICROSOFT 365, IF YOU...

- Are seeking a simplistic, scalable SaaS-based Microsoft 365 backup solution
- Are looking for protection from accidental deletion, malicious insiders, ransomware, and gaps in Microsoft's service agreement policy
- Need variable retention rates for different sets of data
- Want to keep a copy of your Microsoft 365 data in a secure, compliant environment
- Need a simple, scalable solution that allows for a granular search and restore of your backed-up files
- Are re-evaluating your current backup solutions

### Why Otava Cloud Backup for Microsoft 365

#### > Flexible retention and recovery

Don't pay for arbitrary retention you don't need. With our flexible retention policies, you can store your data for 1, 3 or 7 years to adhere to your unique compliance or business requirements. When you need to recover your data, choose from a multitude of options including file restore, .pst, .zip, or email attachment.

#### > Easily meet your compliance needs

Your critical data is encrypted end to end and hosted in centers compliant to HIPAA, PCI, SOC1/2/3, HITRUST, ISO 27001 and Privacy Shield so you can rest assured your backups meet regulations.

#### > Intelligent Search

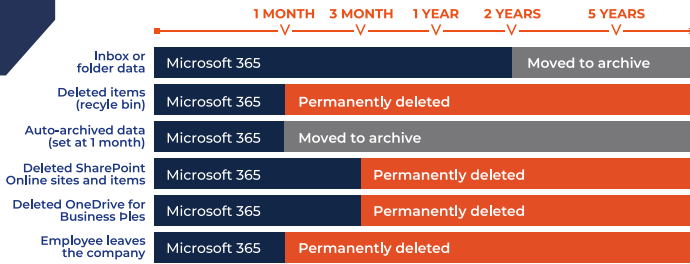

Avoid time-consuming and costly disruptions to your business with eDiscovery on Office 365 data — retrieve your data just as easily as you would with a traditional on-premises data backup.

#### > Comprehensive Backup Coverage

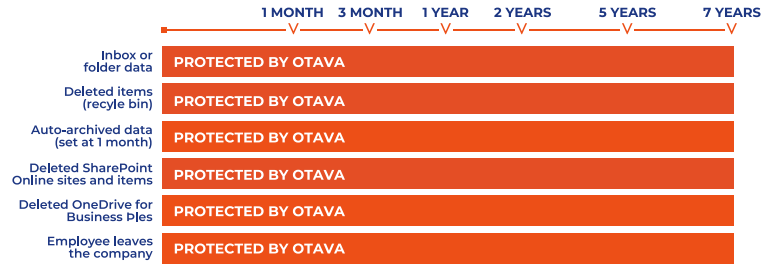

Cloud Backup for Microsoft 365 offers complete coverage of the Microsoft 365 suite, including restoration of SharePoint sites, documents, libraries and lists; OneDrive for Business accounts, files and folders; Exchange mailboxes, archived mailboxes, calendars and contacts; Teams chats, files and sites, and more.

# How Otava Backup for MS365 Fills the Gap in Microsoft's Policies

## Default Protection with Microsoft 365

## Additional Protection with Otava

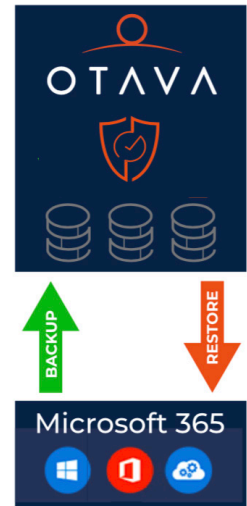

## How Otava Backup for Microsoft 365 Works

Leveraging the latest version of Veeam software, we perform daily backups of the following to our secure cloud infrastructure:

- Ⓞ All SharePoint objects, such as sites, documents, libraries and lists
- Ⓞ All OneDrive for Business objects, such as accounts, files and folders
- Ⓞ All Exchange objects, such as mailboxes, archived mailboxes, calendars and contacts
- Ⓞ All Teams data, such as chats, files, sites and wikis
